Submission for OMB Review; 30-Day Comment Request: The National Physician Survey of Precision Medicine in Cancer Treatment (NCI)

SUMMARY: Under the provisions of Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Cancer Institute, the National Institutes of Health, has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below. This proposed information collection was previously published in the Federal Register on November 18, 2015 (80 FR 72077), and allowed 60-days for public comment. No public comments were received. The purpose of this notice is to allow an additional 30 days for public comment. The National Cancer Institute (NCI), National Institutes of Health, may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

Direct Comments to OMB: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the: Office of Management and Budget, Office of Regulatory Affairs, OIRA_submission@omb.eop.gov or by fax to 202-395-6974, Attention: NIH Desk Officer.

Comment Due Date: Comments regarding this information collection are best assured of having their full effect if received within 30 days of the date of this publication.

FOR FURTHER INFORMATION CONTACT: To obtain a copy of the data collection plans and instruments, or request more information on the proposed project, contact: Janet S. de Moor, PhD, MPH, Project Officer, Division of Cancer Control and Population Sciences, 9609 Medical Center Drive, 3E438, MSC 9764, Rockville, MD, 20850 or call non-toll-free number 240-276-6806 or E-mail your request, including your address to: janet.demoor@nih.gov. Formal requests for additional plans and instruments must be requested in writing.

Proposed Collection: The National Physician Survey of Precision Medicine in Cancer Treatment 0925-NEW, National Cancer Institute (NCI), National Institutes of Health (NIH).

Need and Use of Information Collection: The purpose of this study is to investigate the current practice of precision medicine in cancer treatment among medical oncologists in the U.S. This is a nationally representative survey designed to assess oncologists' current and potential use of genomic testing, to inform the development of interventions to facilitate optimal use of genomic testing and to improve patient-physician discussions of the risks, possible benefits, and uncertainties surrounding the use of these tests. Current knowledge of this topic is limited as there are no nationally-representative studies on this topic to date. There are only two non-federal studies two that have examined physicians' knowledge and attitudes regarding somatic genetic and genomic testing. The survey will be administered by mail and web to medical oncology physicians across the U.S. Non-respondents will be invited to complete a follow-back survey to share their reasons for not participating. The study findings will inform NCI of relevant issues and concerns relating to the application of precision medicine to current and future cancer treatment patterns and practice. This information will also inform the development of new funding initiatives to optimize the use of precision medicine in cancer treatment. Additionally,

information collected as part of this survey will be used to develop physician educational materials to address barriers to precision medicine in cancer care delivery.

OMB approval is requested for 2 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 350.

Total Annualized Burden Hours

Form Name	Type of Respondent	Number of Respondents	Number of Responses per Respondent	Average Burden Per Response (in hours)	Total Annual Burden Hour
Telephone Screener	Receptionists	775	1	3/60	39
Precision Medicine Survey – Pilot Study	Oncology Physicians	175	1	20/60	58
Precision Medicine Survey – Full Study	Oncology Physicians	600	1	20/60	200
Non-response Follow-back Survey	Oncology Physicians	40	1	5/60	3
Telephone Reminder Script	Receptionists	600	1	5/60	50
Total		1,375	2,190		350

Dated: February 11, 2016.

Karla Bailey,

Project Clearance Liaison,

National Cancer Institute, NIH.
